

FOUNDATIONS IN GENESIS IDAHO

MEET THE SPEAKER:

BILL HOESCH

Bill came to Jesus Christ for salvation as a 28-year old professional geologist with a 7.5 year career in oil exploration behind him. Concepts such as plate tectonics, biological evolution, and radioisotope dating were very familiar to him, but had always been interpreted through a grid of particles -to-people evolution and its attendant timescale. That soon changed. With no Bible training, he suddenly found himself amazed at passages like, "...those who worship the Father must worship in spirit and truth," in which our Lord placed a high premium on truth. Soon, Bill found that the old interpretive grid of evolution, along with its attendant timescale, could not withstand skeptical inquiry and instead stood on something other than science. Free to embrace a recent creation and worldwide flood, Bill went on to earn a Master of Science in geology from the Institute for Creation Research, a year as missionary in communist China, followed by 16 years working at the Institute, where research and outdoor education became his love. He has held teaching positions in Christian colleges, seminaries, and ministries, and led dozens of educational field trips to Grand Canyon and other destinations. For the last 4 years has served as the Director for the Mount St. Helens Creation Center in Castle Rock. Please learn more about our ministry at mshcreationcenter.org. It is our conviction that the historical truths of Christ as Creator, Judge, Redeemer, and coming King are foundational to true saving faith.
